

PROPASS 360

HIGH QUALITY BYPASS PROTEIN CONCENTRATE

Rumen Technology in a bag!

KEY FEATURES

- Contains a mixture of high quality plant-based protein sources
- Contains an optimum amino acid profile for high producing dairy cows, lactating ewes and young growing ruminants
- Contains a scientifically researched mixture of essential oils and mineral salts to effectively reduce the rate of protein breakdown in the rumen

KEY ADVANTAGES

- Reduces the rate of breakdown of all diet protein – increases bypass protein levels
- Improves utilization of rumen degradable protein fraction by microbes
- Reduces ammonia absorption from the rumen – lowers blood urea nitrogen levels
- Saves energy expended by the animal's liver to control blood ammonia levels
- Increases milk protein content
- Improves fluidity of colostrum
- Improves fertility

COMPOSITION (MINIMUM VALUES)

Nutrients	g / kg
Protein	360
Bypass protein	210
Lysine	17
Methionine	6
Phosphorous	6.5

FEEDING RECOMMENDATIONS

Type of animal	Daily intake (g)
High producing dairy cows	1500 – 2000
Young growing cattle	500 – 1000
Lactating ewes	100 – 200
Young growing lambs	75 – 100

Registration number (Act 36 / 1947): V19276
Bag weight: 50 kg
